EDUCATION

New York University

Master of Science in Computer Science

Sept 2025 - May 2027

New York, NY | **GPA: 4.0/4.0**

Birla Institute of Technology and Science, Pilani

Bachelor of Engineering in Computer Science, Minor in Finance

Aug 2020 - May 2024

Goa, India | **GPA: 4.0/4.0**

EXPERIENCE

Salesforce Assistant, Tandon Digital Learning

Dec 2025 - Present

New York University

New York, NY

- Rebuilt the Stripe payment and enrollment workflow with Salesforce Flow automations, enabling student onboarding across multiple NYU Tandon courses supporting **\$300K+ in revenue**.
- Designed an Aura-based student site with reusable templates and embedded onboarding paths, standardizing the flow from registration through course access.
- Integrated Salesforce, Stripe, and Brightspace through automated workflows and APIs, reducing manual handoffs and improving enrollment-data consistency across systems.

Data Engineering Intern

Jun 2026 - Aug 2026

Return on Creators

New York, NY

- Shipped an end-to-end iMessage creator onboarding flow with Supabase and automated routing, designed to support up to **1,000 simultaneous creators** without destabilizing existing workflows.
- Developed a mass-messaging feature designed to reach **500 creators** without disrupting the existing backend, accounting for load, failure cases, and operational reliability.
- Re-keyed a production messaging table to a composite key, rebuilt inbound routing across multiple lines, and resolved **3 data-integrity bugs** before they reached the admin-facing UI.

Data Engineer

Jan 2024 - Aug 2025

Visa Inc.

Bengaluru, India

- Redeveloped the end-to-end **MRM process**, cutting turnaround time by **60%** and manual effort by **80%** through an automated model-refitting pipeline.
- Established data-quality validation and monitoring across **15+ production models**, identifying upstream issues before they reached reporting and model consumers.
- Orchestrated dependencies, retries, scheduling, and monitoring across **20+ production workflows** in Apache Airflow, improving reliability of recurring batch processing.
- Engineered large-scale transformations with Python, SQL, PySpark, and Hive while supporting Tableau reporting for **30+ cross-functional stakeholders**.

Data Engineer Intern

May 2023 - Jun 2023

Visa Inc.

Bengaluru, India

- Reduced a production query from **2 hours to under 12 minutes**, a **90% improvement**, using partitioning, caching, and bucketing in Hive and Spark.
- Optimized large-scale analytical workloads through Hive and Spark performance tuning across production datasets.
- Investigated backend bottlenecks and schema-design trade-offs with senior engineers, contributing to troubleshooting and normalization decisions.

PROJECTS

Aries: Real-Time Data Platform | Apache Spark, Kafka, Python, PostgreSQL

- Processed **10,000+ streaming events per second** through a Kafka and Spark pipeline built for real-time analysis and downstream consumption.
- Served live KPIs at **under 100 ms latency** through tiered storage using MinIO and PostgreSQL.

VulCAN: Automated Cloud Vulnerability Analyzer | AWS Fargate, SQS, Python, PostgreSQL

- Accelerated security-remediation workflows by **75%** with an event-driven scanning service deployed through AWS CDK.
- Handled **5,000+ daily jobs** without queue bottlenecks by decoupling asynchronous work with SQS and Fargate.

SKILLS

Languages: Python, SQL, Java, Bash **Data Engineering:** ETL/ELT, Data Warehousing, Data Profiling, Data Quality, Spark, PySpark, Airflow, Data Modeling **Cloud and DevOps:** GCP, AWS, PostgreSQL, Snowflake, Docker, Git/GitHub, CI/CD, Tableau
