EDUCATION

New York University | M.S. Computer Science | Sep 2025 - May 2027

New York, NY | GPA: 4.0/4.0

BITS Pilani, Goa | B.E. Computer Science, Minor in Finance | Aug 2020 - May 2024

Goa, India | GPA: 4.0/4.0

EXPERIENCE

Salesforce Assistant | Dec 2025 - Present

NYU | New York, NY

- Rebuilt Stripe payment and enrollment workflows with Salesforce Flow, supporting student onboarding across NYU courses generating \$300K+ in revenue.
- Designed an Aura-based student site with reusable templates and embedded onboarding paths, from registration through course access.
- Integrated Salesforce, Stripe, and Brightspace through APIs and automated workflows, reducing manual handoffs and improving enrollment-data consistency.

Data Engineering Intern | Jun 2026 - Aug 2026

Return on Creators | New York, NY

- Built an iMessage onboarding flow with Supabase and automated routing, designed to support up to 1,000 simultaneous creators.
- Developed mass messaging designed for 500 creators, accounting for load, failure cases, and backend reliability.
- Re-keyed a production messaging table with a composite key, rebuilt multi-line inbound routing, and resolved 3 data-integrity bugs before they reached the admin UI.

Data Engineer | Jan 2024 - Aug 2025

Visa Inc. | Bengaluru, India

- Automated model-risk management and model refitting, cutting turnaround time by 60% and manual effort by 80%.
- Established data-quality validation across 15+ production models and orchestrated dependencies, retries, scheduling, and monitoring for 20+ Airflow workflows.
- Built large-scale Python, SQL, PySpark, and Hive transformations and supported Tableau reporting for 30+ stakeholders.

Data Engineer Intern | May 2023 - Jun 2023

Visa Inc. | Bengaluru, India

- Reduced a production query from 2 hours to under 12 minutes through partitioning, caching, and bucketing in Hive and Spark.
- Investigated backend bottlenecks and schema-design trade-offs with senior engineers to improve analytical workloads.

PROJECTS

Aries: Real-Time Data Platform | Spark, Kafka, Python, PostgreSQL

- Processed 10,000+ streaming events per second; served live KPIs at under 100 ms through tiered MinIO and PostgreSQL storage.

VulCAN: Automated Vulnerability Analyzer | AWS Fargate, SQS, Python, PostgreSQL

- Accelerated remediation workflows by 75% with an event-driven scanning service; decoupled 5,000+ daily jobs using SQS and Fargate.

RoCathon: Hybrid Creator Search | PostgreSQL, pgvector, Gemini, TypeScript

- Combined semantic retrieval, structured filters, and commerce-aware reranking to search 10,000+ creator profiles.
- Built JSON ingestion and embedding generation pipelines and used HNSW indexing for vector similarity retrieval.

TECHNICAL SKILLS

Languages: Python, SQL, Java, Bash. **Data:** Spark, PySpark, Kafka, Airflow, ETL/ELT, data modeling, data quality.

Cloud & tools: AWS, GCP, PostgreSQL, Snowflake, Docker, Git/GitHub, CI/CD, Tableau.
